

# Exporting a Quiz

## 1. Slide 13: Exporting a Quiz

This shows you "Generate Hardcopy Quiz" dialog. Let's generate a simple web-page tutor with 25 questions (using the current chapter and question selection strategy).

**Note:**

This dialog should be renamed soon.

The screenshot shows a dialog box titled "HardCopy Quiz Creator" with the main heading "Generate Hardcopy Quiz". Below the heading is a descriptive text: "This form allows you to create a hardcopy quiz. Select a template to use and the number of questions you want on the quiz." The form contains the following fields and controls:

- Template File:** A dropdown menu with the selected value "resources\hctemplates\webpage".
- Number of Questions:** A text input field containing the number "25".
- Base URL (blank for default):** An empty text input field.
- File to save to:** A text input field containing "ngs\Haus\My Documents\foo.html" and a "Browse..." button to its right.
- GENERATE AND SAVE:** A large button at the bottom of the dialog.
